The Master Class on Vaginal surgeries has been conceived to enhance the knowledge and skill in vaginal route surgeries amongst practitioners and youngsters. The Cochrane database promotes vaginal route of hysterectomy over other routes in view of feasibility, cost, patients comfort & least complication rate.

We have meticulously planned 6 modules spreading over 12 hours online to deal with basic anatomy of pelvic floor, non descent vaginal hysterectomy & associated challenges, surgeries for uterine & vault prolapse and incontinence. The faculty is from the Society of Vaginal Surgeons of Delhi and India which will be deliberating on evidence based practices.

This academic exercise will open new horizons towards keyhole surgery via natural route.
